Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)
Office Action Summary	09/834,833	SATHYANARAYAN, RAMAPRAKASH H.
Office Action Guilliary	Examiner	Art Unit
	Isaac M. Woo	2166
The MAILING DATE of this communication app Period for Reply	pears on the cover sheet with the	correspondence address
A SHORTENED STATUTORY PERIOD FOR REPL' WHICHEVER IS LONGER, FROM THE MAILING D Extensions of time may be available under the provisions of 37 CFR 1.1 after SIX (6) MONTHS from the mailing date of this communication If NO period for reply is specified above, the maximum statutory period of Failure to reply within the set or extended period for reply will, by statute Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be will apply and will expire SIX (6) MONTHS from the cause the application to become ABANDO	ON. timely filed om the mailing date of this communication. NED (35 U.S.C. § 133).
Status		
1) Responsive to communication(s) filed on 01 F	ebruary 2007.	•
2a) This action is FINAL . 2b) This	action is non-final.	
3) Since this application is in condition for allowa	nce except for formal matters, p	prosecution as to the merits is
closed in accordance with the practice under E	Ex parte Quayle, 1935 C.D. 11,	453 O.G. 213.
Disposition of Claims		
4) Claim(s) <u>1,4-19,29-34,36,38,39,43 and 45-47</u>	is/are pending in the application	1.
4a) Of the above claim(s) is/are withdraw	wn from consideration.	
5) Claim(s) is/are allowed.	•	
6) Claim(s) is/are rejected.		
7) Claim(s) is/are objected to.		
8)⊠ Claim(s) <u>1, 4-19, 29-34, 36, 38-39, 43 and 45-</u>	47 are subject to restriction and	I/or election requirement.
Application Papers		
9) The specification is objected to by the Examine	er.	
10) The drawing(s) filed on is/are: a) acc	epted or b) objected to by the	e Examiner.
Applicant may not request that any objection to the	drawing(s) be held in abeyance. S	See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correct	tion is required if the drawing(s) is	objected to. See 37 CFR 1.121(d).
11)☐ The oath or declaration is objected to by the Ex	kaminer. Note the attached Office	ce Action or form PTO-152.
Priority under 35 U.S.C. § 119		
12) Acknowledgment is made of a claim for foreign a) All b) Some * c) None of:	priority under 35 U.S.C. § 119	(a)-(d) or (f).

Art Unit: 2166

DETAILED ACTION

1. This action is in response to application, filed on February 01, 2007 has been considered but are deemed moot because of Restrictions Request below.

2. Claims 1, 4-19, 29-34, 36, 38-39, 43 and 45-47 are pending.

Election/Restrictions

- 3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4-10, 19, 29-31, 34, 36, 38-39, 43 and 45, drawn for a parent process checking if a first item in the plurality is a file or a directory, the parent process conditionally copying the first item if the first item is found during the checking to be a file and alternatively creating a child process, after creation, the child process performs the checking, the conditionally copying and the alternatively creating, with another item in the directory represented by the first item, wherein the parent process performs the checking, the conditionally copying and alternatively creating,

Application/Control Number: 09/834,833

Art Unit: 2166

with a second item in the plurality, which is generating database and data structure, classified in class 707, subclass 102.

Page 3

- II. Claims 11-18 and 32-33, drawn for transferring data from the file into a temporary buffer, locking the temporary buffer, and invoking a direct memory access (DMA) process for making a copy from the temporary buffer, which is direct memory accessing, classified in class 711, subclass 112.
- III. Claims 46-47, drawn for the parent process conditionally copying the first item if the first item is found during the checking to be a file and alternatively creating a child process in the computer after changing a default limit on a resource to a maximum limit, after creation, the child process inherits the maximum limit and performs the checking, the conditionally copying and the alternatively creating, with another item in the directory represented by the first item, wherein after the creation, the parent process performs the checking, the conditionally copying and alternatively creating, with a second item in the list, wherein at least one of the parent process and the child process, allocates memory to hold at least a temporary buffer and a stack, stores in the stack an absolute path and a local path to said directory, which is configuring memory, classified in class 711, subclass 170.

Application/Control Number: 09/834,833

Art Unit: 2166

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for parent process checking if a first item in the plurality is a file or a directory. the parent process conditionally copying the first item if the first item is found during the checking to be a file and alternatively creating a child process, after creation, the child process performs the checking, the conditionally copying and the alternatively creating, with another item in the directory represented by the first item, wherein the parent process performs the checking, the conditionally copying and alternatively creating, with a second item in the plurality, which is generating database and data structure. Invention II can be used for transferring data from the file into a temporary buffer, locking the temporary buffer, and invoking a direct memory access (DMA) process for making a copy from the temporary buffer, which is direct memory accessing. Invention Ill can be used for the parent process conditionally copying the first item if the first item is found during the checking to be a file and alternatively creating a child process in the computer after changing a default limit on a resource to a maximum limit, after creation, the child process inherits the maximum limit and performs the checking, the conditionally copying and the alternatively creating, with another item in the directory represented by the first item, wherein after the creation, the parent process performs the checking, the conditionally copying and alternatively creating, with a second item in the list, wherein at least one of the parent process and the child process, allocates memory

to hold at least a temporary buffer and a stack, stores in the stack an absolute path and a local path to said directory, which is configuring memory. See MPEP 806.05(d).

- 5. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III each other, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 8. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).
- 9. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2166

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac M. Woo whose telephone number is (571) 272-4043. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain T. Alam can be reached on (571) 272-3978. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
